Tool Price Range from $5-$60

Prices listed on each tool page are to be referenced if a tool is lost or broken from our Lending Library. All listed prices are based off of Home Depot or Lowe’s products.
Border Fork

The Border Fork is used to loosen, lift and turn over the soil in gardening and farming. It is used similarly to a spade, but in many circumstances it is more appropriate than a spade. The metal tines allow the tool to be pushed more easily into the ground. It is not easily stopped by stones so it can rake out stones and weeds and break clods. The Border Fork does not cut through weed roots or root-crops.

Quantity:
Short: 4
Tall: 7

Price: $50
Bulb Planters are made to dig precise holes for bulbs. Some are marked in inch gradients for exact hole depth. The digging tube grabs and removes soil to allow the bulb to be planted. A long-handled version allows extra pressure from the foot.

Quantity: 5
Price $6.00
Claw (Small)

The small claw is a great little hand tool to loosen up your soil in potter plants. It can also be used for low maintenance work in your garden for cultivating around your plants and retrieving weeds easily.

Quantity: 37

Price $8.00
Claw (Standard)

The standard claw is a great garden tool for cultivating many soil types through aerating, turning, and weeding. Use the comfort grip handle for easy spiral turn action. Do not bend the tool when using.

Quantity: 1
Price $30.00
Edger (Round)

For finishing touches, this tool has sharp edges to do the garden grooming. The round edger can cut off grass that grows towards the curb that's connected to a sidewalk or driveway.

Quantity:
Short: 6
Tall: 4
Price $30.00
Edger (Square)

The square edger is slightly different from the round edger because it can cut through roots with its sharp edges and helps pull up unwanted plants in your garden.

Quantity: 3
Price $53.00
Furrow (Triangle) Garden Hoe

The furrow (triangle) garden hoe is recommended for making seed drills and furrows. It is also can be used for earthing up vegetables.

The blade is heart shaped or triangular with the point facing downwards, yet has no cutting edge. The neck is swan shaped rather than straight to avoid building up soil behind the blade.

Quantity: 1

Price $30.00
Hand Garden Fork

The hand garden fork is best used on small areas in the garden to cultivate and loosen up your soil. It’s used similar to the border fork but for smaller projects such as container gardening and planter pots.

Quantity: 11

Price $5.00
Garden Shark Rake

The garden shark rake is slightly different from other types of rakes because of the curved edges of the teeth (which look like a shark). This allows the rake to gather, draw or remove more objects from your soil such as leaves, rocks and other debris.

Quantity: 21
Price $45.00
Hand Spade

Also called hand trowels, when big garden jobs demand a real workhorse turn to the hand spade. The spade is the garden tool to for turning soil, creating a new flower bed, transplanting small shrubs or digging a ditch. The spade is the way to go!

Quantity: 28

Price $15.00
Tool Lending Brochure PART II
Flathead Garden Hoe

This tool can be used to remove small amounts of soil. In addition to digging or moving soil, it can agitate the surface of the soil around plants, piling soil around the base of plants (hilling), creating narrow furrows (drills) and make shallow trenches for planting seeds.

It can also chop weeds, roots or crop residues, such as when harvesting root crops like potatoes.

Quantity: 5
Price $20.00
Flathead Garden Hoe (with holes)

The flathead garden hoe with holes is used almost the same as the regular flathead hoe in that it removes small amounts of soil and chops weeds. But it can also help to aerate the soil and remove large debris and rocks.

Quantity: 1
Price $20.00
Leaf Rakes

A leaf rake is used to collect leaves, hay, and grass. In the garden it can be used for loosening the soil, light weeding, leveling, and removing dead grass or plants.

Quantity: 8

Price $20.00
Pitch Fork

A pitchfork has a long handle and widely separated pointed tines (also called prongs). It is used to lift and pitch loose material, such as hay, straw or leaves.

Quantity: 1

Price $40.00
Shears

Pruning shears, also called hand pruners, or secateurs, are a type of scissors for plants. They are strong enough to prune hard tree or shrub branches sometimes up to a few centimeters thick but can also cut through more delicate plant stems.

Quantity:
Small: 13
Large: 5

Price $15.00
Shovels

Use for digging, lifting, and moving bulk materials, such as soil, gravel, snow, and sand. Shovels are common tools that are used extensively in agriculture, construction, and gardening.

Quantity:
Tall: 10
Short: 1

Price $40.00
Transplanter Shovels

This shovel is great for transplanting your bigger crops. It can be used like a regular shovel, but can cut through roots with as well.

Quantity:
Short: 2
Tall: 23

Price $50.00
Weeder

This weeder has a long handle for digging up weeds. It is designed to scrap out weeds growing in crevices, stone walls and other deep and narrow places.

Many models have a curved piece of metal along the handle which is put against the ground while the tip is digging.

Quantity: 32

Price $8.00
Weeder (Cobra Head)

The knife-quality sharpened steel blade cuts through soil easily and becomes an extension of your hand. Its all-purpose design precisely removes weeds and roots. Its narrow enough to fit into spots a hoe can't reach. Ideal for digging out sidewalk cracks, cultivating, furrowing, creating seed holes and transplanting.

Quantity: 3
Price $10.00
Weeder (Scraper)

About a 10” long weeder, it has a sharp blade set at a perfect angle for quick and easy weeding. The blade is pointed at one end for cleaning weeds out of cracks in the sidewalks and tight spots.

Quantity: 8

Price $10.00
More Weeding Varieties

Crack Weeder
Price $10.00
Quantity: 1
Children Wheel Barrow

Have your little one come and join you in the garden, you will get a lot more work done!

Quantity: 1 Price $30.00
